December 8, 2022

Daniel Agustin Godoy, MD
President
Latin American Brain Injury Consortium

Dear Dr. Godoy,

On behalf of the Neurocritical Care Society (NCS), I am pleased to inform you that your request for the Latin American Brain Injury Consortium to become an affiliate of the NCS Global Partners Program has been approved. We welcome you as a Global Partner in the South America Regional Chapter!

The aim of the NCS is to support developing neurocritical care sections, chapters, or interest groups within existing national societies, or as newly founded societies to advance the mission of improving care for critically-ill patients with neurological diseases. In the interest of this aim, three goals for long-term desired accomplishments; 1) subspecialty certification, 2) advancing research and 3) organizing a national meeting, are identified to be achieved as a result of this affiliation within 4 years.

Benefits of Approved Global Partners:

- 40% discount will be offered for NCS membership dues **except** for countries with World Bank B classification. The NCS Executive Office will require a list of your membership with email addresses and NCS will provide information/instructions on how to join NCS at the discounted rate (if applicable).
- The NCS and the international society will exchange email member lists to promote society activities/events free of charge.
- An official recognition of the affiliation will be posted on the respective websites.
- The international society will designate a liaison who is a full NCS member to participate on the NCS Global Regional Committee. The liaison will actively participate via conference call, email contact, or in person with the NCS Global Committee on a 3-4 times per year basis.
- NCS will work collaboratively via the Global Regional Committees to help advance the long-term goals of the partner. Initiatives requiring financial support from NCS must be approved by the NCS Board of Directors.
- Discounted fees for Annual Meeting registration will be offered to the partner members that join NCS.

Please feel free to contact the Executive Director Mindy Saraco at msaraco@neurocriticalcare.org or (202) 367-2449 if you have any questions.

Sincerely,

Sarah Livesay, DNP, APRN, ACNP-BC, ACNS-BC, FNCS
